**Readings in Computer Architecture**

Mark D. Hill, University of Wisconsin-Madison Computer Sciences, Norman P. Jouppi, Compaq Western Research Laboratory, and Gurindar S. Sohi, University of Wisconsin-Madison Computer Sciences

**Table of Contents**

Preface

1. Classic Machines: Technology, Implementation, and Economics
2. Methods
3. Instruction Sets
4. Instruction Level Parallelism (ILP)
5. Dataflow and Multithreading
6. Memory Systems
8. Single-Instruction Multiple Data (MIMD) Parallelism
9. Multiprocessors and Multicomputers
10. Recent Implementations and Future Prospects
Preface

Classic Machines: Technology, Implementation, and Economics

Methods

Instruction Sets

Instruction Level Parallelism (ILP)

Dataflow and Multithreading

Memory Systems

I/O: Storage Systems, Networks, and Graphics

Storage Systems

Networks

Graphics

Single-Instruction Multiple Data (SIMD) Parallelism

Multiprocessors and Multicomputers

Recent Implementations and Future Prospects
