Key to Table Entries

Form Based

The feature is present but only through menu picks on a form-based interface. For field searches that are form based, the searchable fields are listed below the words "Form based."

"..."

Type terms between double quotation marks.

ADJ

This is a proximity operator that requires search terms to appear next to each other.

NEAR/N

This is a proximity operator that specifies the maximum number of words one search term should be from another. NEAR/10 would mean within 10 words; NEAR/N indicates that the user specifies the number of words.

NA

Feature not available.

For the complete story on Internet search engines, see the September 1996 "End User's Corner" column in InterNIC News: <http://rs.internic.net/nic-support/nicnews/archive/september96/enduser.html>
